Hitherto, more than 300 species of isopod crustaceans have been reported in Japan and its neighboring waters, but no comprehensive catalogue has been published in this country. Therefore, in order to promote studies on the group, Saito has prepared a tentative catalogue on isopod crustaceans in Japan. Nunomura (on all the order but the suborder Epicaridea) and Itani (on the suborder Epicaridea) revised the draft.

In the present paper, we listed 644 species (29 species of Anthuridea, 19 species of Gnathiidea, 161 species of Asellota, 100 species of Epicaridea, 75 species of Valvifera, 120 species of Flabellifera and 139 species of Oniscidea and 1 species of Tyloidea).

従来わが国ならびに近隣海域では、300種以上の等脚目甲殻類が報告されていた。しかし、包括的な目録が公にされたことは無かったので、著者のひとり齋藤が、わが国ならびに近隣海域を含めて、文献を調査し、目録を作成した。それを伊谷（ヤドリムシ亜目）、布村（ヤドリムシ亜目以外）が吟味した。本目録では644種（ウミナナフシ亜目29種、ウミクワガタ亜目19種、ミズムシ亜目161種、ヤドリムシ亜目100種、ヘラムシ亜目75種、有扇亜目120種、ワラジムシ亜目139種、ハマダンゴムシ亜目1種）を報告した。

* 富山市科学文化センター研究業績第219号

はじめに

等脚目甲殻類は十脚目や端脚（ヨコエビ）目と共に最も普通に採集される大型底生甲殻類である。布村（1995; 1997a）によると本邦には約300種の既知種が報告されているが、わが国におけるこの類の分類学に関する研究はまだまだ遅れており、未記載種も多いと考えられる。ヨコエビ類の研究動向についてもほぼ同様であるが、Ishimaru（1994）は日本産ヨコエビ類約320種のチェックリストを公表した。等脚類についてはこのようなリストは公表されておらず、その必要性を感じた齋藤が自らの収集した文献に基づき目録を作成したものである。それに布村がヤドリムシ亜目を除くグループについて「明らかに学名の訂正になった種」を修正し、いくつかの欠落していた重要文献だけを付け加えたものである。また、この両名が従来研究したことのないヤドリムシ亜目については伊谷が、同様な追加訂正を行った。今回日本及びその近海を含めて、644種（内訳はウミナナフシ亜目29種、ウミクワガタ亜目19種、ミズムシ亜目161種、ヤドリムシ亜目100種、ヘラムシ亜目75種、有扇亜目120種、ワラジムシ亜目139種、ハマダンゴムシ亜目1種。なお、種名のついていないものは種数から除く）の等脚目甲殻類をリストアップした。収集した情報量が完全とは言い難いが、これから日本産等脚類の研究を進めるにあたり、手がかりになるとと考え公表する。

収集した文献を元にシノニムリストをとりまとめ、報告地も併記した。なお、著者名にアステリクス(*)のついたものは直接論文に当たったものではなく、間接的な引用である。文献によりシノニムの関係が異なっている場合があり、本報告が現在有効なリストであるかどうかは不明である。特に有扇亜目のコツブムシ科についてはかなり混乱していたといえる。寄生性の種については宿主も記述した。学名・和名とも原著にしたがったため、現在では名前の変更されているものも多く含まれている。Kussakinによるモノグラフ（1979a；1982；1988），Gurjanovaによるモノグラフ（1936）

b）及びThielemann（1910）の報告等の重要な文献については、記載される種のうち、分布に「日本」または「日本海」と記述されるものをピックアップした。

これらの中には既知の論文中（椎野や布村等）に掲載されていない種が多くあり、これらの種はシノニムとして整理されている可能性も考えられる。

本目録には多くの図鑑類を引用している。これら図鑑については以下の略称を用いて示している。〔学水動〕学研生物図鑑水生動物、内海富士夫監修、1981、学研；〔旧日動〕日本動物図鑑改訂版、内田清之助監修、1957、北隆館；〔原動大〕原色動物大図鑑（IV），岡田要・内田清之助・内田亨監修、1961、北隆館；〔原海動〕原色日本海岸動物図鑑、内海富士夫、1956、保育社；〔原甲検〕原色甲殻類検索図鑑、武田正倫、1982、北隆館；〔標原海〕海岸動物図鑑：標準原色図鑑全集16、内海富士夫・西村三郎・鈴木克美、1971、保育社；〔検日海〕原色検索日本海岸動物図鑑（II），西村三郎編、1995、保育社；〔日土検〕日本産土壤動物検索図説、青木淳一監修、1991、東海大学出版会；〔日海プロ〕日本産海洋プランクトン検索図説、千原光雄・村野正昭編、1997、東海大学出版会；〔日淡生〕日本淡水生物学（河村多寛二原著）、上野益三、1973、北隆館；〔新日動〕新日本動物図鑑（中）、岡田要編、1965、北隆館；〔山溪海〕海辺の生き物：山溪フィールドブックス⑧、奥谷喬司・楚山 勇監修、1994、山と渓谷社。
