Home

This interactive photographic guide shall help you to identify higher plants from Africa (excluding Madagascar).

It contains images of ferns and seed plants usually taken in the field. You can [browse](#) through a taxonomic hierarchy and / or [search](#) according to selected characters you observe on your plant. For more details, please have a look at this [presentation of the database published in Taxon](#). A map and occurrence records can be accessed via [GBIF](#).

Images may be used free for non-commercial scientific and educational purposes. All other uses need permission from the copyright holder or us. Please always cite the photographer's name (as copyright holder) and the database in full:

Dressler, S., Schmidt, M. & Zizka, G. 2014 + [continuously updated]. African Plants - A Photo Guide. www.africanplants.senckenberg.de. - Forschungsinstitut Senckenberg, Frankfurt/Main, Germany. [accessed date-month-year]
