VOL. 6 1991

Special Issue
Artificial Intelligence and Construction: Research in Europe

Editor-in-Chief
HOJJAT ADELI

Guest Editor
PATRICE POYET

ELSEVIER APPLIED SCIENCE
CONTENTS

Special issue: Artificial Intelligence and Construction: Research in Europe

Biography of the Guest Editor .................................................. 263

Guest Editorial ........................................................................... 265

Building Product Modelling Using Relational Databases, Hypermedia Software and CAD Systems
BO-CHRISTER BJÖRK & HANNU PENTTILÄ (Finland) ................. 267

Expert Systems and Documentary Databases Integration
PHILIPPE DEBRAS, PATRICE POYET & ERIC BRISSON (France) ............. 281

A Knowledge-Based System for Seismic Vulnerability Assessment of Masonry Buildings
FABIO CASCIATI & LUCIA FARAVELLI (Italy) .......................... 291

The Development of a Knowledge Based System for Predicting Building Maintenance
IAN D. WATSON, PETER S. BRANDON & ANDREW BASDER (UK) ........ 303

A Requirements Analysis/Educational Design for Courseware Relating to Heat Loss Through Building Walls
MARCUS M. KEANE & PAUL F. MONAGHAN (Republic of Ireland) .... 311

Information Integration in the Building and Construction Industries
W. F. GIELINGH & F. P. TOLMAN (The Netherlands) .................. 329

A 2-D Finite Model for Unsteady Free-Surface Flow and its Experimental Verification
S. K. W. TOU (Singapore) .......................................................... 335

Announcement ........................................................................... 343

Contents of Volume 6 .................................................................. 345

Author Index to Volume 6 .............................................................. 349

Forthcoming Papers .................................................................... 351
