# CONTENTS

## PREFACE

## 1 INTRODUCTION TO ADAPTIVE FILTERING

1.1 Introduction .......................... 1
1.2 Adaptive Signal Processing .......... 2
1.3 Introduction to Adaptive Algorithms .. 4
1.4 Applications .......................... 7
1.5 References ............................ 11

## 2 FUNDAMENTALS OF ADAPTIVE FILTERING

2.1 Introduction .......................... 13
2.2 Signal Representation ................. 14
   2.2.1 Deterministic Signals .......... 14
   2.2.2 Random Signals ................ 15
   2.2.3 Ergodicity ..................... 21
2.3 The Correlation Matrix ................ 23
2.4 Wiener Filter ........................ 34
2.5 Linearly Constrained Wiener Filter ... 39
   2.5.1 The Generalized Sidelobe Canceller 43
2.6 Mean-Square Error Surface .......... 44
2.7 Bias and Consistency ................ 47
2.8 Newton Algorithm .................... 48
2.9 Steepest-Descent Algorithm .......... 49
2.10 Applications Revisited .............. 54
   2.10.1 System Identification ......... 54
   2.10.2 Signal Enhancement ........... 55
   2.10.3 Signal Prediction .............. 56
   2.10.4 Channel Equalization ........... 57
   2.10.5 Digital Communication System ... 65
2.11 Concluding Remarks ................ 67
2.12 References .......................... 68
2.13 Problems ............................. 70
## 3 THE LEAST-MEAN-SQUARE (LMS) ALGORITHM

3.1 Introduction 77
3.2 The LMS Algorithm 77
3.3 Some Properties of the LMS Algorithm 79
   3.3.1 Gradient Behavior 79
   3.3.2 Convergence Behavior of the Coefficient Vector 80
   3.3.3 Coefficient-Error-Vector Covariance Matrix 82
   3.3.4 Behavior of the Error Signal 85
   3.3.5 Minimum Mean-Square Error 85
   3.3.6 Excess Mean-Square Error and Misadjustment 87
   3.3.7 Transient Behavior 89
3.4 LMS Algorithm Behavior in Nonstationary Environments 90
3.5 Complex LMS Algorithm 94
3.6 Examples 95
   3.6.1 Analytical Examples 95
   3.6.2 System Identification Simulations 107
   3.6.3 Channel Equalization Simulations 113
   3.6.4 Fast Adaptation Simulations 114
   3.6.5 The Linearly Constrained LMS Algorithm 118
3.7 Concluding Remarks 121
3.8 References 124
3.9 Problems 126

## 4 LMS-BASED ALGORITHMS

4.1 Introduction 131
4.2 Quantized-Error Algorithms 132
   4.2.1 Sign-Error Algorithm 133
   4.2.2 Dual-Sign Algorithm 140
   4.2.3 Power-of-Two Error Algorithm 141
   4.2.4 Sign-Data Algorithm 141
4.3 The LMS-Newton Algorithm 143
4.4 The Normalized LMS Algorithm 145
4.5 The Transform-Domain LMS Algorithm 147
4.6 The Affine Projection Algorithm 156
   4.6.1 Misadjustment in the Affine Projection Algorithm 161
   4.6.2 Behavior in Nonstationary Environments 169
   4.6.3 Transient Behavior 171
   4.6.4 Complex Affine Projection Algorithm 173
4.7 Simulation Examples
  4.7.1 Signal Enhancement Simulation
  4.7.2 Signal Prediction Simulation
4.8 Concluding Remarks
4.9 References
4.10 Problems

5 CONVENTIONAL RLS ADAPTIVE FILTER
  5.1 Introduction
  5.2 The Recursive Least-Squares Algorithm
  5.3 Properties of the Least-Squares Solution
    5.3.1 Orthogonality Principle
    5.3.2 Relation Between Least-Squares and Wiener Solutions
    5.3.3 Influence of the Deterministic Autocorrelation Initialization
    5.3.4 Steady-State Behavior of the Coefficient Vector
    5.3.5 Coefficient-Error-Vector Covariance Matrix
    5.3.6 Behavior of the Error Signal
    5.3.7 Excess Mean-Square Error and Misadjustment
  5.4 Behavior in Nonstationary Environments
  5.5 Complex RLS Algorithm
  5.6 Simulation Examples
  5.7 Concluding Remarks
  5.8 References
  5.9 Problems

6 DATA-SELECTIVE ADAPTIVE FILTERING
  6.1 Introduction
  6.2 Set-Membership Filtering
  6.3 Set-Membership Normalized LMS Algorithm
  6.4 Set-Membership Affine Projection Algorithm
    6.4.1 A Trivial Choice for Vector $\tilde{\gamma}(k)$
    6.4.2 A Simple Vector $\tilde{\gamma}(k)$
    6.4.3 Reducing the Complexity in the Simplified SM-AP Algorithm
  6.5 Set-Membership Binormalized LMS Algorithms
    6.5.1 SM-BNLMS Algorithm 1
    6.5.2 SM-BNLMS Algorithm 2
  6.6 Computational Complexity
  6.7 Time-Varying $\tilde{\gamma}$
  6.8 Partial-Update Adaptive Filtering
    6.8.1 Set-Membership Partial-Update NLMS Algorithm

10 ADAPTIVE IIR FILTERS 395
10.1 Introduction 395
10.2 Output-Error IIR Filters 396
10.3 General Derivative Implementation 400
10.4 Adaptive Algorithms 402
  10.4.1 Recursive Least-Squares Algorithm 402
  10.4.2 The Gauss-Newton Algorithm 404
  10.4.3 Gradient-Based Algorithm 407
10.5 Alternative Adaptive Filter Structures 407
  10.5.1 Cascade Form 407
  10.5.2 Lattice Structure 409
  10.5.3 Parallel Form 416
  10.5.4 Frequency-Domain Parallel Structure 417
10.6 Mean-Square Error Surface 426
10.7 Influence of the Filter Structure on the MSE Surface 433
10.8 Alternative Error Formulations 435
  10.8.1 Equation Error Formulation 435
  10.8.2 The Steiglitz-McBride Method 439
10.9 Conclusion 442
10.10 References 443
10.11 Problems 446
11 NONLINEAR ADAPTIVE FILTERING 451
   11.1 Introduction 451
   11.2 The Volterra Series Algorithm 452
      11.2.1 LMS Volterra Filter 454
      11.2.2 RLS Volterra Filter 457
   11.3 Adaptive Bilinear Filters 464
   11.4 Multilayer Perceptron Algorithm 469
   11.5 Radial Basis Function Algorithm 473
   11.6 Conclusion 480
   11.7 References 482
   11.8 Problems 484

12 SUBBAND ADAPTIVE FILTERS 485
   12.1 Introduction 485
   12.2 Multirate Systems 486
      12.2.1 Decimation and Interpolation 486
   12.3 Filter Banks 488
      12.3.1 Two-Band Perfect Reconstruction Filter Banks 493
      12.3.2 Analysis of Two-Band Filter Banks 494
      12.3.3 Analysis of M-Band Filter Banks 494
      12.3.4 Hierarchical M-Band Filter Banks 495
      12.3.5 Cosine-Modulated Filter Banks 495
      12.3.6 Block Representation 497
   12.4 Subband Adaptive Filters 497
      12.4.1 Subband Identification 501
      12.4.2 Two-Band Identification 502
      12.4.3 Closed-Loop Structure 502
   12.5 Cross-Filters Elimination 508
      12.5.1 Fractional Delays 510
   12.6 Delayless Subband Adaptive Filtering 515
      12.6.1 Computational Complexity 517
   12.7 Frequency-Domain Adaptive Filtering 521
   12.8 Conclusion 530
   12.9 References 531
   12.10 Problems 533

A COMPLEX DIFFERENTIATION 571
A.1 Introduction 571
A.2 The Complex Wiener Solution 571
A.3 Derivation of the Complex LMS Algorithm 574
A.4 Useful Results 575

B QUANTIZATION EFFECTS IN THE LMS ALGORITHM 577
B.1 Introduction 577
B.2 Error Description 577
B.3 Error Models for Fixed-Point Arithmetic 579
B.4 Coefficient-Error-Vector Covariance Matrix 580
B.5 Algorithm Stop 582
B.6 Mean-Square Error 582
B.7 Floating-Point Arithmetic Implementation 584
B.8 Floating-Point Quantization Errors in LMS Algorithm 585

C QUANTIZATION EFFECTS IN THE RLS ALGORITHM 589
C.1 Introduction 589
C.2 Error Description 589
C.3 Error Models for Fixed-Point Arithmetic 591
C.4 Coefficient-Error-Vector Covariance Matrix 592
C.5 Algorithm Stop 595
C.6 Mean-Square Error 596
C.7 Fixed-Point Implementation Issues 597
C.8 Floating-Point Arithmetic Implementation 597
C.9 Floating-Point Quantization errors in RLS Algorithm 600
D KALMAN FILTERS

D.1 Introduction 605
D.2 State-Space Model 605
   D.2.1 Simple Example 606
D.3 Kalman Filtering 608
D.4 Kalman Filter and RLS 614
