

# Drugs for Cough

## Pharyngeal Demulcents

Lozenges, Cough Drops,  
Linctuses Syrup, Glycerin,  
Liquorice

## Expectorants /Mucokinetics

Those which helps to  
Expel the cough.  
or which increase the kinetic  
movement of cough

## Antitussive Cough center suppressers

Drug which decrease  
sensitivity of cough center.

**Adjuvant Antitussive**  
Bronchodilators, Salbutamol,  
terbutaline

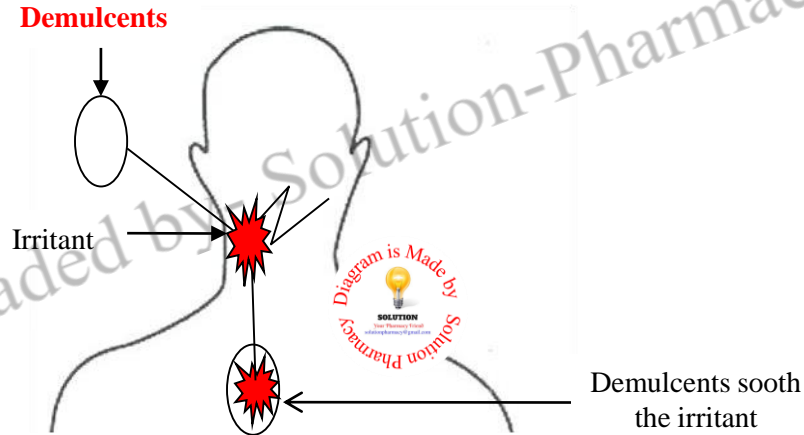

<https://pushpendrakpatel.wixsite.com/solution>

Mechanism of Action	Example of the Class
<b>Bronchial secretion enhancer</b>	Sodium citrate, Potassium citrate, Potassium Iodide, Guaiphenesin, Balsum of tolu, Vasaka, Ammonium Chloride. सेक्रेशन पे प्रभाव पड़ेगा इससे गले से बेहतर वोइस आनी चालू होगी
<b>Mucolytics</b>	Bromhexine, Ambroxole ,Acetyl cysteine Carbocisteine, बैठा आवाज अब चालू हो जाएगा

Mechanism of Action	Example of the Class
<b>Opioids</b>	Codeine, Pholcodeine कफ को फेक दो
<b>Non Opioids</b>	Noscapine, Dextromethorphan, Chlophedianol नहीं देना चोकलेट कफ में
<b>Antihistaminic</b>	Chlorpheniramine, Diphenhydramine, Promethazine. चलो डर्ट को प्रिवेंट करें (Asthma is related with dust)

# Pharyngeal Demulcents

**Demulcent** soothe and cover the irritant and the stimulus released by irritant. This is not a treatment; this is just a temporary relief.

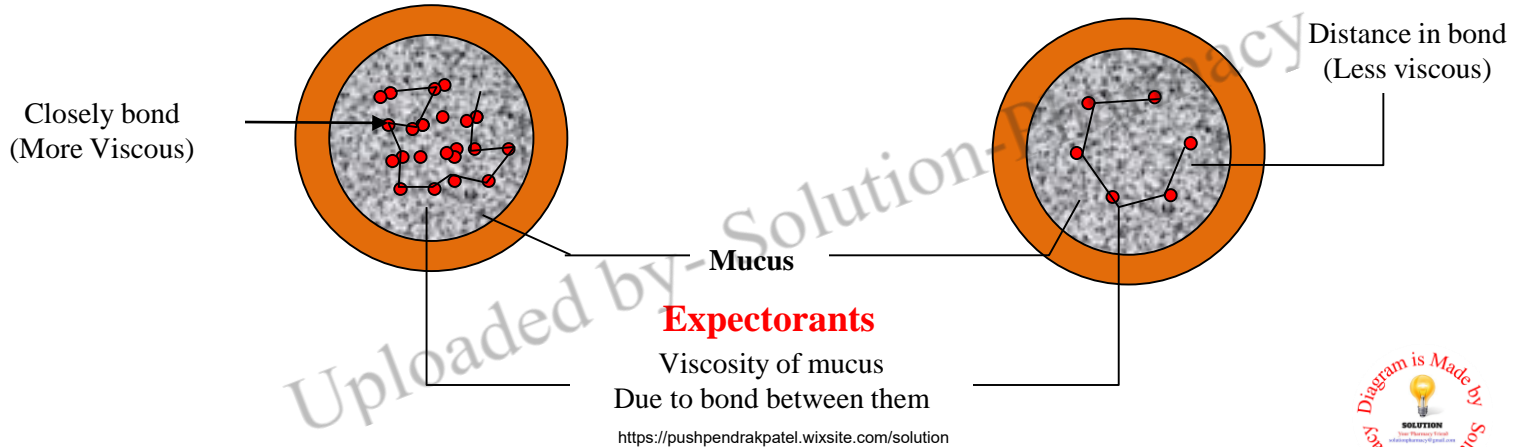

<https://pushpendrakpatel.wixsite.com/solution>

**Lozenges, Syrup, Glycerin, Cough Drops, Linctuses, Liquorice**

लो सिरप पी के गले का कवर लगा लिया

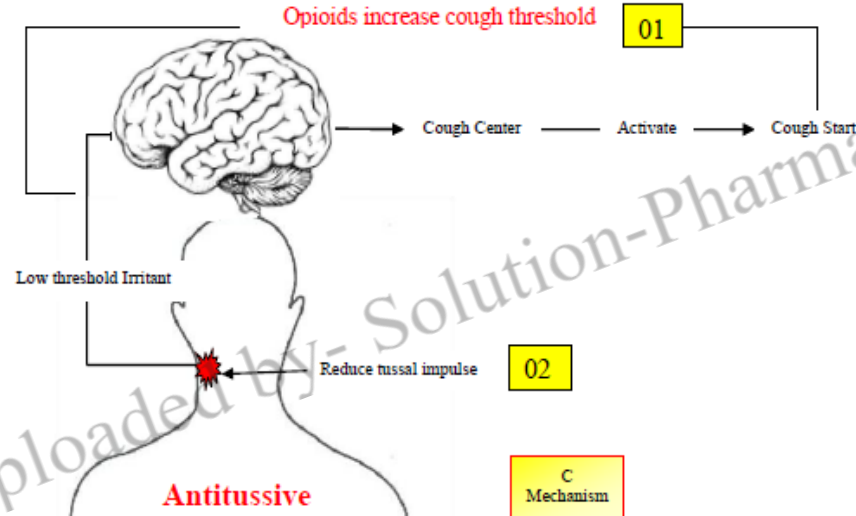

# Expectorants /Mucokinetics

**Expectorant** or **Mucokinetics** are the drugs which produce their action either by increasing mucus production or by decreasing the viscosity of fluid so they become thin and easily expelled out.

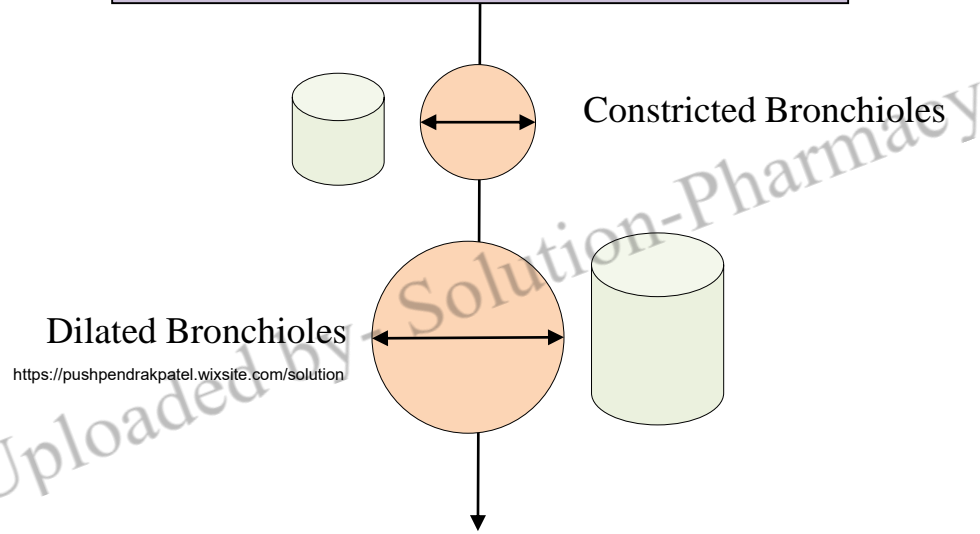

Mechanism of Action	Example of the Class
<b>Bronchial secretion enhancer</b>	Sodium citrate, Potassium citrate, Potassium Iodide, Guaiphenesin, Balsum of tolu, Vasaka, Ammonium Chloride. <b>साल्टेड पीनट पकड़ो इससे गले से बेहतर वोइस आनी चालू होगी</b>
<b>Mucolytics</b>	Bromhexine, Ambroxole, Acetyl cysteine Carbocisteine, <b>बैठा आवाज अब चालू हो जाएगा</b>

# Antitussive cough center suppressers

Mechanism of Action	Example of the Class
<b>Opioids</b>	Codeine, Pholcodeine कोल्डिंक को फेक दो <a href="https://pushpendrakpatel.wixsite.com/solution">https://pushpendrakpatel.wixsite.com/solution</a>
<b>Non Opioids</b>	Noscapine, Dextromethorphan, Chlophedianol नहीं देना चोकलेट कफ में
<b>Antihistaminic</b>	Chlorpheniramine, Diphenhydramine, Promethazine. क्लोरमिंट दिए तो प्रॉब्लम बढेगी

# Adjuvant Antitussive

**Bronchodilators, Salbutamol, Terbutaline**

ब्रोंकिआ को डाइलेट करना हो तो गले को साल्ट से तर कर दो
