

## Dear Colleague

If you are currently choosing a scientific journal for rapid publication of research results, then I invite you to submit your manuscript to the new international scientific journal ***Trends in Ecological and Indoor Environment Engineering (TEIEE)*** (publishing house in Poland). Why should you choose this:

- quick first decision
- free publication (including assignment of DOI), if the manuscript is submitted before February 29, 2024
- open access
- active promotion of the journal to well-known international scientometric databases
- the opportunity to personally consult with the editor-in-chief regarding the improvement of the manuscript in order to meet the high journal criteria.

The journal has great potential for rapid development, since the editorial staff of the journal consists of highly qualified experienced editors from different continents of the world.

Often publications in foreign scientific journals are necessary due to university requirements.

Visit the scientific journal's website to find out more: <https://www.teiee.net/>

The journal's scope includes, but is not limited to:

- environmental safety
- environmental engineering
- environmental risks
- GIS technologies and remote sensing
- industrial safety
- occupational Safety and Health
- industrial hygiene
- production risks and risks to public health
- designing (creating) an ideal environment for work and leisure, and others.

We look forward to receiving your manuscript as soon as possible. International teams of authors are welcome.

We would be grateful for disseminating information to all interested parties (colleagues, students, etc.)

Please feel free to ask any questions.

## Thank you and best wishes
